

XLX Skid safe lift frame

RQ-009

Description

The XLX Skid Safe Lift Frame is designed to be fitted to the four mounting pins on an XLX ROV based Skid, and allows the skid to be lifted by crane with a four point sling set shackled to the lift frame. The lift frame is connected to the skid by placing the mounting pins inside the mounting tubes and running a clevis pin through both. An R-clip is then inserted through the clevis pin, preventing the pin from sliding out.

What's Included

- XLX Skid Safe Lift Frame
- Sling Set and Shackles
- ROV Clevis Pins and R-clips
- Certificate of Testing
