

RQ-029 - Hydraulically actuated 10k Psi Test Panel

WHATS INCLUDED

10,000 PSI Test Panel.
Operational hoses.
Operations Manual.
Certification Pack.

OPTIONS

Spares Kit.
10k IHPU.
Fluid Reservoirs.

Key Features:

- Visual subsea display gauges showing injection pressures at both ends of the test.
- Simple to integrate.
- Simple Hydraulic actuation to open and close the valves
- Transducers can be fitted instead of or with gauges for electronic measurement and data logging.

Description:

The 10k psi Test Panel is designed to be used in conjunction with our 10k psi IHPU (P/N: RQ-012) and provides a means of pressure testing equipment.

The unit allows pressurised delivery fluid from the 10k psi IHPU to be locked in by the hydraulically actuated ball valves.

Options:

Can be supplied with pressure transducers and laptop for Realtime datalogging and verification.

The unit consists of a dual input and output setup allowing it to supply pressurised delivery fluid from Outputs A and/or B of the 10k psi IHPU as required.

Overall Specifications	
Weight in Air	6.4 Kg
Weight in Water	5 Kg
Dimensions	L400 x W220 x H200mm
Suitable Media	Sea Water, Glycol, Hydraulic Oil
Input / Outputs	
Max Delivery Fluid Pressure	690 Bar (10,000 PSI)
Max Piston Pressure	200 Bar (2,890 PSI)
Hydraulic Connections	
Inlets A & B	4 JIC
Outlets A & B	4 JIC
Piston Connections	4 JIC
