Stroke Reducer Kits
Alternative Heads – type B or C
Spares Kit.

Description

The Forum Linear Actuator Override Tools are available in a range of loads up to 120 tonnes. The tool supplied usually comprises two parts, the Locking Head, and the Actuator.

The actuator contains a hydraulically operated piston powered by an intensifier. Actuators can be supplied with hot stabs and check valves. The locking head is a purely mechanical device and is left behind on a subsea interface when the valve is required to be let overridden. A range of strokes are available to suit specific applications.

Key Features

- Range of interfaces
- Up to 120 Tonne force
- Range of strokes
- Hydraulic set, mechanical locked
- Manipulator or TDU deployed
